Products from the renowned Italian agricultural design company Faresin Industries will be on display for the first time at this year's Dowerin Field Days.

AML Equipment, the WA dealership for Faresin Industries, will display several models of telehandlers and feed mixers, all designed for agricultural use.

Paul Veza, of AML Equipment, said the 7.30c Agritop telehandler, which had rear hydraulic three point linkage and 540/1000 mechanical PTO capabilities, was attracting significant interest from broadacre farmers.

"There are 30 different models available, but the telehandlers designed specifically for agricultural use have a boom reach of up to 10 metres," he said.

He said the telehandler offered a fast, flexible alternative to the traditional loader when moving hay, fertiliser or grain.

"This product can be used to do numerous jobs on the property — it's a simple use, fast and manoeuvrable compact machine."

Mr Veza said only one other company in the world made a similar product to the 7.30c Agritop telehandler.

AML Equipment will also display the Rambo and Magnum Double livestock feed mixers.

The trailer mixers can be towed behind any tractor, and with either a single or double augur, can be used for mixing hay, oats, barley, or other raw grains.
